

Commerce Architectural Glazing Systems

STRENGTH AND PERFORMANCE

Introducing Commerce – Ezial's stunning range of Architectural Glazing Systems. The Commerce range offers supreme configuration versatility, enhanced weather durability, economical insulation and simplified fabrication. Designed to cater for the needs of commercial buildings and infrastructure, the Commerce range provides additional strength and performance capabilities to protect frequently-exposed areas.

45MM COMMERCIAL DOOR

Featuring Ezial's Ezi-Seal technology, as well as self-draining sills and transoms, this highly-functional range provides optimal weather management and durability. Fixed panels with profound adaptability enable configuration with various framing suites, doors and windows – as well as louvres and infill panels – across the entire range. With so much combination versatility, Ezial's innovative Commerce range offers flexibility, enhancing architectural scope and creativity.

Commerce Centre Glazed

Offering supreme weather durability – thanks to Ezi-Seal technology – as well as self-draining sill and transom designs, insulation and noise reduction. This system is also extremely versatile and can adapt to accommodate a wide variety of mixed combinations with other Ezial systems.

FEATURES & BENEFITS

- Reduced labour costs with the use of a captive wedge
- Simple and efficient fabrication with the use of straight cutting
- Self-draining sill and transom designs for enhanced water management
- Ezi-Seal technology for effective insulation, acoustics and weather durability

Commerce Front Glazed

Ideal for low-rise and high-rise curtain walls, shopfronts and high-end housing applications, the Commerce Front Glaze System features clean lines and precise square cuts for an exceptional and streamlined architectural finish.

FEATURES & BENEFITS

- Reduced labour costs with the use of a captive wedge
- Simple and efficient fabrication with the use of straight cutting
- Self-draining sill and transom designs for enhanced water management
- Ezi-Seal technology for effective insulation, acoustics and weather durability
- Increases rentable area of the building
- Self-cleaning by design

Commerce Front Double Glazed

This highly-stylish offering provides functional benefits, such as energy efficiency, noise reduction and enhanced durability. A sealed air gap between the two glass panes acts as an additional layer of insulation.

FEATURES & BENEFITS

- Reduced labour costs with the use of a captive wedge
- Simple and efficient fabrication with the use of straight cutting
- Self-draining sills and transom designs for enhanced water management
- Double-glazing, fused with Ezi-Seal technology, delivers supreme insulation, acoustics and weather durability
- Increases rentable area of the building
- Self-cleaning by design

Commerce Front Glazed Stackable

Ezial's Front Glazed Stackable support structure is virtually invisible, providing a flat and lustrous glass façade finish.

FEATURES & BENEFITS

- Repeated modular unitised system
- Near-invisible support structure
- Higher and wider glass openings across multiple floors
- Designed to cater for structural movement, expansion and contraction
- Lower material costs when compared to a suspended system
- Wide range of expansion and contraction movement between floors
- Self-draining sill and transom designs for enhanced water management
- High performance seals for optimum insulation, acoustics and weather durability

Commerce 45mm Commercial Door

Capable of combining with all systems within the Ezial Commerce range, this flexible product can be used with lowlights, highlights and sidelights.

FEATURES & BENEFITS

- Flush pocket glazing
- Direct clamping system – easy positioning of rails and mid-rails
- No processing of the stiles
- Simple and efficient fabrication
- Ezi-Seal technology for effective insulation, acoustics and weather durability
- High-performance ball bearing rollers for smooth, effortless operation
- Compatible with a wide range of quality hardware

Commerce Fixed Louvre

Ezial's Commerce Fixed Louvres provide an eco-friendly and efficient ventilation solution, allowing constant air circulation. Reduce electricity costs and boost the GreenStar rating of your building by providing a natural alternative to artificial cooling. Commerce Fixed Louvres are ideal for car parks, offices, schools and plant rooms.

FEATURES & BENEFITS

- Effective ventilation
- Energy efficient
- Controls sunlight and heat
- Stylish architectural appeal
- Additional privacy

Commerce Sub-Framing

Ezial offers a wide variety of Sub-framing options to complement our entire range of Architectural Systems. For added practicality, our two-part subjambs can be fitted along with subheads and subsills as part of the pre-framing process.

FEATURES & BENEFITS

- Snap-in beads for efficient and immaculate fitting
- Ensures perfectly square opening for outer frames
- Prevents the window / door from getting damaged during installation
- Improves thermal and acoustic insulation
- Seals and sill baffles for enhanced weather durability
- Improves water and expansion capabilities
